1 on behalf of　**2** in spite of　**3** for fear of　**4** with regard to

(16) Before the presentation, Mr. Smith always asks one of his colleagues to (16) his slides to check for mistakes.

1 hand in　**2** carry on　**3** hurry up　**4** go over

(17) ***A:*** Who is the fastest runner on the track team?
B: That would be John. He is (17) the fastest runner on the team. In fact, he is the fastest runner in the whole school.

1 by far　**2** in case　**3** at most　**4** on board

大問2A 長文の語句空所補充 Q18-Q20

次の英文A，Bを読み，その文意にそって(18)から(23)までの( )に入れるのに最も適切なものを選びなさい。

Plants That Eat Insects

There are many unique plants in the world. Plants can be put into groups according to their features. For example, some plants have flowers, and others do not. Leaves of some trees stay green year-round, and those of others turn red or even fall off. There is still another interesting type of group. This grouping is based on (18). Some people might be surprised to know that some plants eat insects, and to most people's surprise, there are more than six hundred kinds of these plants in the world.

There are several ways in which those plants catch insects. One of the ways is to attract insects to leaves that have a sweet smell and are shaped like small bags. When an insect enters one of the bags, the plant then closes the bag around it. (19) insects fall into the leaves, they can never get out. The leaves are closed and filled with a substance that breaks down their bodies. Another way is to use leaves with sticky drops. When insects stop on the leaves, the drops cover their bodies, and they cannot breathe. Therefore, they die.

Plants that catch insects grow in certain areas. Plants usually take nitrogen, a substance from the ground, to grow. However, when there is not enough nitrogen in the ground, they eat insects instead by using their open leaves to trap insects. This is because bodies of insects contain nitrogen. Some scientists even suggest that the plants can be used when (20). Their open leaves mean that the ground in those areas has low nitrogen.

(18)

1 how plants grow in different places　**2** where plants grow in the natural world　**3** what plants use for their food source　**4** when plants bloom during the year

(19)

1 Once　**2** Even though　**3** Before　**4** Unless

(20)

1 people find their way in the woods　**2** people check the condition of the soil　**3** there are too many dangerous insects　**4** there is no food or water for animals

大問2B 長文の語句空所補充 Q21-Q23

次の英文A，Bを読み，その文意にそって(18)から(23)までの( )に入れるのに最も適切なものを選びなさい。

A Bus System in Curitiba

Curitiba, a city in Brazil, has experienced rapid population growth since the 1960s. To cope with the issue of the population growing too much, city planners originally thought of building a subway system and making the streets wider to allow more traffic on the roads. (21), a young mayor believed that this would cost the city too much and thought of another way to use what they already had. In particular, he decided to build a bus system using the roads that already existed.

First, the mayor decided to turn the inner lanes of the road into bus-only lanes. By building bus stops between the inner lanes, buses traveling in both directions could share the same stops. In addition, passengers pay the same fare to go in the same direction regardless of the number of changes or distance. These ways were introduced (22). As a result, most of the residents of the city came to live within 400 meters of a bus stop, and the city buses make more than 20,000 trips a day.

The number of privately owned cars in the city has increased rapidly over the past fifty years. However, the gasoline used per person remains about one-third of that of other cities in Brazil. This is because many people choose to use the city's efficient and reliable bus system instead of driving. Keeping bus fares low also allows more people to (23). This method not only solves environmental problems but also helps people earn more money to improve their quality of life.

(21)

1 By the way　**2** However　**3** For one thing　**4** Of course

(22)

1 to make boarding easy and smooth　**2** to let the elderly take bus seats　**3** to decrease the number of passengers　**4** to reduce market competition

(23)

1 drive their cars on weekends　**2** avoid spending money on education　**3** promote the bus system to other cities　**4** take buses to work in the city

大問3A Follow-up on the Interview

メールを読み、次ページのQ24-Q26に答えなさい。

From: Emma Passi
To: Takeru Chen
Date: February 21
Subject: Follow-up on the interview

Thank you for attending the first interview for the position at the International Student Center. Probably due to our recent appearance in the media and the increase in followers on our social media accounts, we had many more people interested in this position than usual. We sincerely apologize for keeping you waiting before finally inviting you to the interview. Additionally, we made you wait another two weeks after the first interview.

I'm writing this e-mail because I'd like to ask you to provide the result of an official language test that proves your language ability. We all know that you speak good English from the interview, but we still need the document as part of our process. Since many of our students speak English, we can make them feel comfortable by demonstrating the language ability of each worker here.

I would like to invite you to the next interview. This time, you will be speaking with people working at the center. We have different events happening every day and would like to discuss in the interview how you would handle them. Two people from the center will be joining us on that day. Our school will cover the cost of transportation this time, and I would like you to fill out the form sent with this e-mail to let us know which dates are convenient for you.

大問3A Follow-up on the Interview

前ページのメールを読み、Q24-Q26に答えなさい。

(24) More people were interested in the position because

1 the hiring process at the International Student Center was simpler this year.
2 media reports about the International Student Center increased interest in the role.
3 the International Student Center offered higher salaries than other positions.
4 the International Student Center opened a social media account recently.

(25) Why does the International Student Center need a language test result?

1 To provide language training for new employees.
2 To follow the rules of having employees with international backgrounds.
3 To improve the language skills of the students.
4 To make students feel at ease by showing the staff's language skills.

(26) What is the purpose of the next interview?

1 To talk about handling daily tasks at the center.
2 To show Takeru around the center and ask him about the place.
3 To decide the details of Takeru's employment conditions.
4 To have a group discussion on recent global issues.

大問3B 長文

本文を読み、次ページのQ27-Q31に答えなさい。

Letter-Locking

In Europe, using envelopes to hold letters became common in the nineteenth century after the Industrial Revolution, but letters were used as a communication tool long before that. If letters were sent as they were, just like a postcard today, anybody could read the content. Therefore, to send letters with contents that senders did not want others to read, they used a technique called "letter-locking." Spies were not the only ones who used this technique. Many regular letter writers also knew how to do it.

There are many different letter-locking techniques. One simple way is to fold a letter several times and put the last part into a pocket created by the folds. The most difficult method for making letters safe by folding has over thirty steps. It requires folding the letters many times, cutting small parts, and putting those parts through tiny holes. When these steps are done correctly, the letters hold themselves closed tightly. The letters cannot be opened without breaking the lock part. Because of this, the intended receiver can know if somebody else has tried to read the letter.

Letter-locking techniques may have helped people who wanted to send letters safely. However, they have been a problem for experts who study history. One way through which people who study history get information about cultures and society is by reading letters written at that time. Letter-locking techniques make it difficult for experts to get such information. The delicate paper makes it harder for experts to open letters without damaging them. Moreover, the letter-locking technique itself is valuable, and its value will be lost once opened.

Some researchers studied 250,000 historical letters to gather data on letter-locking techniques. They used a collection of a lot of letters that were never delivered. This happened because, in some European countries, people had to pay to get their letters. They then took 3D pictures of a letter sent about 300 years ago. Using the latest technology, they succeeded in opening it on a computer screen and reading the content. This technology will likely improve people's understanding of history.

大問3B 長文設問 Q27-Q31

前ページの本文を読み、最も適切なものを1つ選びなさい。

(27) The use of letter-locking techniques was

1 a difficult practice in Europe for security purposes.
2 a common practice among those who sent letters.
3 a limited practice for important documents between officials.
4 an educational practice taught at schools throughout Europe.

(28) One benefit of putting a cut part through a hole is to

1 allow the receiver to open the letter easily without a knife.
2 prevent the letter from sticking to other letters.
3 show evidence that someone tried to open the letter before.
4 make sure that people can easily find the letter later.

(29) Why is it hard for experts to open letters that are closed with letter-locking techniques?

1 It reduces the value of letters that use letter-locking techniques.
2 It can make the family of receivers of the letters angry.
3 It causes letters written in ink to disappear in the process.
4 It shows the person who secretly wrote the letter.

(30) Why were the letters in the collection not delivered?

1 There were not enough people who delivered letters.
2 National security information was included in them.
3 They were damaged and difficult to deliver.
4 The money required to receive them was not paid.

(31) Which of the following statements is true?

1 The use of envelopes in Europe increased after the Industrial Revolution.
2 Most letter-locking techniques needed more than thirty steps to complete.
3 The research team gathered data on different letters without a 3D machine.
4 Letter-locking techniques are no longer meaningful to understand a letter's value.
