(17) ***A:*** How did your sister's new restaurant do over the Thanksgiving holiday?
B: Very well. (17) sales, it was the best weekend since she opened the restaurant.

1 In terms of　**2** In front of　**3** In honor of　**4** In spite of

大問2A 長文の語句空所補充 Q18-Q20

次の英文A，Bを読み，その文意にそって(18)から(23)までの( )に入れるのに最も適切なものを選びなさい。

The Fabergé Picture Frames

Peter Carl Fabergé was a Russian jewelry maker known for his amazing skill and beautiful designs, especially famous for his special Easter eggs. They were fancy and detailed objects shaped like eggs. When two picture frames he made were found at an English museum, they contained photographs. The museum's efforts to identify the women in the photographs were unsuccessful. However, the museum (18) and displayed the picture frames with a note next to them asking for help to learn more about the photographs.

A woman who visited the museum tried to find out when the photographs were taken by looking at the hairstyles and clothes. She thought one of the women had been about forty years old when the pictures were taken. This helped her guess the year when the woman was born and got married. Since Fabergé's jewelry is expensive, she thought the woman must be from a rich family. She compared the woman to wedding pictures of rich families from that time. (19), she found out who the woman was.

What this museum visitor accomplished was not only solving a mystery, but it has also been said that visitors to the museum became more engaged with the displayed items. They can now feel more connected to history. This means that a museum is not simply a place to display things but also a place where (20). They can look closely at the items and share their own thoughts. It can also be said that every displayed item has its story and that each item is special.

(18)

1 hid the photographs　**2** refused further research　**3** was not aware of the jewels　**4** did not give up the effort

(19)

1 At first　**2** In this way　**3** On the other hand　**4** In addition

(20)

1 people find a new job　**2** visitors can get involved　**3** history lovers can write books　**4** famous people come

大問2B 長文の語句空所補充 Q21-Q23

次の英文A，Bを読み，その文意にそって(18)から(23)までの( )に入れるのに最も適切なものを選びなさい。

Ancient Travel Routes in Medieval Norway

In Norway, researchers have found an old shelter made of stones in a mountain. It is believed the shelter was used about 1,000 years ago. It was on the part of a long travel route across the Hardanger Plateau. Ancient stone shelters were built by travelers for rest. Although one scientist discovered one of the ancient shelters in the 1800s, the roof had already broken down. It was not the only discovery, however. Recently, scientists went to the same place and found (21). This discovery suggests that the route was used earlier than they thought.

In another part of Norway, the Lendbreen pass was discovered as the ice melted away. This pass was used over 1,000 years ago for about 500 years. The pass was often used in the winter when the land was covered with snow. Shoes, wooden skis, arrows, and horse bones were discovered there. One surprising find was an old tunic, which survived the ages. It is now Norway's oldest piece of clothing. (22), the ice kept these things in good condition for many years.

These discoveries give useful information about how people lived in the past. The Lendbreen pass was an important road for trade. Farmers, hunters, and travelers carried goods such as dairy products and things like animal leather through the pass. Over the years, because of colder weather and widespread disease, (23). After people stopped using the pass, it was forgotten. However, because of rising temperatures, items that had been kept hidden have started to appear, and scientists are discovering more about the past.

(21)

1 an even newer animal bone　**2** an even older shelter　**3** a simple way to build a shelter　**4** a modern route for cars

(22)

1 By mistake　**2** Rather　**3** For instance　**4** In fact

(23)

1 a roof covering the pass was made　**2** frozen ground melted little by little　**3** the pass came to be used less　**4** small houses were built on the pass

大問3A Your Rice Cooker

メールを読み、次ページのQ24-Q26に答えなさい。

From: Luis Santos
To: Sofia Cruz
Date: November 7
Subject: Your rice cooker

Thank you very much for contacting our customer service last week. We are glad that you shared detailed information about the problem with the electric rice cooker you recently bought. The information was shared with the technical team in our company, and we carefully discussed the problem in several meetings.

We believe the best course of action is for you to return the rice cooker to us. Once we get the cooker, we will carefully check it to find the cause of the problem. We understand that this will probably be inconvenient for you. But we want to make sure you get a rice cooker that works perfectly. Our main aim is to provide you with a good, reliable kitchen device that meets your needs and to learn from the issue to prevent future problems.

To send it back, please use the shipping label I have sent to you with this e-mail. There is no need for you to pay for the shipping. Please pack the item in the original box or another box for protection. And please make sure to include all the parts, accessories, and documents that came with it when you first bought it. A new rice cooker has already been shipped to you. Please allow about five days for it to arrive.

大問3A Your Rice Cooker

前ページのメールを読み、Q24–Q26に答えなさい。

(24) What happened to the information Sofia Cruz shared last week?

1 It was used to create a new product instruction manual.
2 It was reviewed by the company's team and discussed in meetings.
3 It was posted on the company website for people to read.
4 It was sent to the sales team for a customer feedback study.

(25) Luis Santos asks Sofia to return the rice cooker in order to

1 check it with an expert who designed it.
2 confirm whether the item was used properly.
3 find out what caused the problem.
4 get it repaired at the company's factory.

(26) What is Sofia told to do?

1 Mail Luis after the rice cooker arrives in five to six weeks.
2 Contact the company representative after sending the rice cooker back.
3 Test the new rice cooker with all the accessories and write a review.
4 Wait until the new rice cooker comes in several more days.

大問3B 長文

本文を読み、次ページのQ27-Q31に答えなさい。

George Washington Carver

George Washington Carver was an African American scientist who improved farming. His strong love for plants started in childhood. After being freed from slavery, which was a system of forced labor, he was raised by a kind couple. They encouraged him to study plants and gardening. He knew that repeatedly growing the same crop could take away important elements from the land and make it harder to keep growing crops in the future. To improve this situation, he focused on methods to grow different crops one after another, which would maintain the land's health.

The crop Carver grew to improve the land in the southern United States was peanuts. Cotton farming was damaging the quality of land in the southern region. Carver's research showed that peanuts could help improve the land by adding nitrogen, a key element for plants to grow. This provided a solution to this issue. Thanks to his efforts, peanut production increased in the southern United States, and by the 1940s, it had grown to become one of the major crops in the country.

Carver's work also helped improve farming education. He developed a program at Tuskegee University to educate students. It focused on growing new types of crops and growing different crops in turn. Carver's teaching efforts went beyond the classroom. He was one of the first people to use a mobile classroom known as the Jesup Wagon to visit farmers and provide farming education directly to them. He published many reports with practical advice that helped both farmers and teachers. His popular articles were given out for free. They helped improve the productivity of farmers and their way of life.

Carver is recognized as a symbol of African American success. He is remembered as a leader in eco-friendly farming and a person who helped people through science and education. His achievements are celebrated through the George Washington Carver Museum at Tuskegee University, schools that were named after him, special stamps, and coins. His research has also influenced modern farming and science such as the possible use of peanuts as food for astronauts in space. His work on peanuts remains important today.

大問3B 長文設問 Q27-Q31

前ページの本文を読み、最も適切なものを1つ選びなさい。

(27) What did George Washington Carver learn after being freed from slavery?

1 It was possible to create a new crop that would make money for farmers.
2 It was difficult to develop plant food for increased crop production.
3 It was not easy to change the old farming methods used before slavery.
4 It was not good to grow only one kind of crop over and over again.

(28) Carver grew peanuts in the southern United States and showed that

1 farmers could sell peanuts for a high price and become richer.
2 peanuts could change damaged land into better land for growing crops.
3 a new type of peanut could improve people's health.
4 the value of peanuts was going to decrease in the long run.

(29) What was true about the Jesup Wagon?

1 It helped farmers use new machines to grow crops efficiently.
2 It was a classroom that stayed in one location for teaching.
3 It helped farmers learn farming methods locally.
4 It was a library that students could use for free.

(30) Carver's research could help to use peanuts to

1 develop snacks and meals for children to enjoy at school.
2 create food options for people who travel to space.
3 produce tasty dishes for athletes who want to stay strong and healthy.
4 make special desserts for families to share during holiday gatherings.

(31) Which of the following statements is true?

1 Carver was raised by parents who studied plants at a university.
2 Carver created a new type of cotton to help farmers.
3 Carver persuaded farmers to stop growing peanuts as their crops.
4 Carver is remembered through places named after him.
