解答方法 各問について、最も適切なものを1つ選び、問題冊子の選択肢に○を付けてください。

正解は最終ページにあります。すべて解いてから確認してください。

大問1 語彙・文法 Q1-Q4

次の(1)から(17)までの()に入れるのに最も適切なものを1, 2, 3, 4の中から一つ選び、その番号を解答用紙の所定欄にマークしなさい。

(1) **A:** I heard that your father became a dentist because he was afraid of going to the dentist.**B:** Yes, that's true. The (1) is that he is now a dentist himself.

1 irony 2 impression 3 adventure 4 option

(2) **A:** So, Fiona, what exactly are you studying at university?**B:** I'm studying (2) because I have always wanted to design beautiful and functional buildings one day.

1 architecture 2 furniture 3 infection 4 horizon

(3) Before making a decision about his career, Akira decided to (3) his university's career guidance counselor. He wanted to get some professional advice.

1 prohibit 2 consult 3 bother 4 imitate

(4) In art class, Ms. Jones gave each of the students a ball of (4). She told them that they should use it to make a plate, a bowl, a cup, or a vase.

1 loss 2 clay 3 opinion 4 manner

大問1 語彙・文法 Q5-Q9

次の(1)から(17)までの()に入れるのに最も適切なものを1, 2, 3, 4の中から一つ選び、その番号を解答用紙の所定欄にマークしなさい。

- (5) The soccer team realized that they needed to (5) their defense after the match in which they allowed seven goals. Now, they are training to improve their skills.
1 recover 2 strengthen 3 interrupt 4 gather
- (6) Patricia thought she had explained the game's rules (6), but when her friends started playing, some of them did not know what to do. Patricia had to explain the rules again.
1 thoroughly 2 refreshingly 3 formerly 4 purely
- (7) The school had (7) how much money it would need for the trip to the science museum. Each student would have to pay five dollars.
1 calculated 2 encountered 3 influenced 4 represented
- (8) When the deliveryman arrived, Hannah was (8) because she had just gotten out of the shower. She quickly put on some clothes and went to answer the door.
1 naked 2 obvious 3 intensive 4 proper
- (9) **A:** Are there any (9) to the rule that all visitors must show their ID?
B: Yes, children under ten don't need to show their ID.
1 punishments 2 exceptions 3 concentrations 4 requirements

大問1 語彙・文法 Q10-Q13

次の(1)から(17)までの()に入れるのに最も適切なものを1, 2, 3, 4の中から一つ選び, その番号を解答用紙の所定欄にマークしなさい。

(10) The cake that Aaron's sister made tasted terrible, but Aaron (10) that he liked it because he did not want to make her feel bad.

- 1 discovered 2 pretended 3 estimated 4 wondered

(11) **A:** Have you given up on your diet?
B: No, I'm going to (11) it this time. I want to be healthier.

- 1 look at 2 walk away 3 stick to 4 run across

(12) **A:** Oh, I wrote the wrong date on this letter. What should I do?
B: Just (12) the date and write the correct one above it.

- 1 pull away 2 cross out 3 knock down 4 turn off

(13) The construction of the new library is (13). The builders hope to finish it by the end of next year.

- 1 in case 2 in progress 3 at peace 4 at random

大問1 語彙・文法 Q14-Q17

次の(1)から(17)までの()に入れるのに最も適切なものを1, 2, 3, 4の中から一つ選び, その番号を解答用紙の所定欄にマークしなさい。

- (14) **A:** Dad, please let me have one! All my friends have smartphones, and I really need one for school.
B: No, Sarah. I'm not going to (14) just because your friends have them.

1 take off 2 give in 3 bring up 4 come up

- (15) **A:** How did the meeting go?
B: Not well. We decided to (15) the discussions because we couldn't agree on a price.

1 fall for 2 take up 3 break off 4 let down

- (16) **A:** (16) how much I try to go to sleep early, I always end up staying awake until midnight.
B: Maybe you should try putting your smartphone in another room at night.

1 No better 2 No matter 3 Depending on 4 Based on

- (17) Some students prefer studying alone, while others like working in groups. (17), group work helps students learn from each other more effectively.

1 In contrast 2 In detail 3 In short 4 In general

大問2A 長文の語句空所補充 Q18-Q20

次の英文A, Bを読み, その文意にそって(18)から(23)までの()に入れるのに最も適切なものを1, 2, 3, 4の中から一つ選び, その番号を解答用紙の所定欄にマークしなさい。

Honeybees

Experts from a university in the United States have developed (18) to track the movements of honeybees. They put small QR codes on the backs of more than 30,000 honeybees to record their flight patterns. They also placed sensors with a camera for scanning the codes at places where bees live. This allowed them to collect data on when and how far the honeybees fly. They were also able to observe honeybees' behavior twenty-four hours a day for a whole week.

A surprising finding was made through this study. The experts placed tracking tags on young honeybees (19). This allowed them to observe their behavior for a much longer period than before. It has long been believed that honeybees live up to about twenty-eight days. However, they discovered that honeybees stayed active for about six weeks through their honey-collecting behavior. This showed that honeybees lived much longer than originally thought.

Another interesting finding was about their flights. Although people believe honeybees fly up to ten kilometers from their homes, the data showed they did not fly that far. Most honeybees in the study flew only a few minutes at a time. This suggests that if enough food is near their homes, they tend not to fly far. (20), growing plants near where they live could help keep them from flying long distances. This could also help meet the standards for organic honey certification. If no chemicals are used around them, the honey they collect will not contain them. This means people can control the quality of the honey.

(18)

- 1 a communication tool 2 a teaching method 3 an innovative way 4 a training program

(19)

- 1 well before they were born 2 while they were collecting honey 3 when they were about to die 4 soon after they emerged from their cells

(20)

- 1 In contrast 2 In other words 3 Finally 4 Rather

次の英文A, Bを読み、その文意にそつて(18)から(23)までの()に入れるのに最も適切なものを1, 2, 3, 4の中から一つ選び、その番号を解答用紙の所定欄にマークしなさい。

A separate team of engineers studied the mechanism using a different computer model. As a result, they found that (23). Some experts thought it had not been built for everyday use because some gears may have frequently stopped working. Rather, they believed it served either as an educational tool or to demonstrate the knowledge and skills of ancient scientists. Even if it was not used daily, it remains one of the most impressive ancient devices that has been discovered.

1 most of the parts 2 ancient coins were 3 the computer model 4 the device was not
were missing placed inside made mistakes perfect

大問3A Your car

メールを読み、次ページのQ24-Q26に答えなさい。

From: Marco Lee <marco@speedwaymotors.com>
To: Sophia Rodriguez <srodriguez@fastlink.com>
Date: October 7
Subject: Your car

Dear Ms. Rodriguez,

Thank you for coming to our shop the other day. I was glad that the weather was nice that day, and you could try the Tiger Platinum X in the neighborhood in perfect condition. It was a good chance to see how you felt when you drove the car. We are currently working on the Tiger Platinum X, the used car you ordered. We believe that it will take longer than we had informed you during the last phone conversation.

Right now, our team is carefully repairing the engine. Since you need to drive long distances frequently, we are paying close attention to making sure it is in the best possible condition. Also, we are painting the scratches on the driver's side door and the back section, making sure the color matches exactly with the original. Because of these tasks, it is taking more time, but please understand that all these processes are necessary to provide you with a safe and perfect car.

Considering what we have done so far, we believe we can deliver the car by the end of next week. We will contact you once the exact date has been determined. If you have questions about the progress of the work or the car's condition, please contact us without hesitation. We are sorry for the delay, and we would appreciate your understanding and cooperation.

Sincerely,
Marco Lee
Speedway Motors

大問3A Your car

前ページのメールを読み、Q24-Q26に答えなさい。

- (24) When Sophia Rodriguez visited Marco Lee's shop, she
- 1 spoke with the staff about the delay in the delivery of new cars.
 - 2 got into the Tiger Platinum X and drove it around the area.
 - 3 looked at the Tiger Platinum X in one of the pamphlets there.
 - 4 was informed of which parts of her car the shop had ordered.

- (25) Why is the team taking extra time to finish the car Sophia ordered?
- 1 Because they are installing a new sound system and checking the air conditioner.
 - 2 Because they are repairing tires and adjusting the car's headlights.
 - 3 Because they are inspecting electrical systems and adding new seats.
 - 4 Because they are fixing the engine and painting scratched sections.

- (26) Why will Marco contact Sophia in the future?
- 1 To ask her to choose a different color for her car.
 - 2 To inform her of the day when they can deliver her car.
 - 3 To tell her the name of the mechanic working on her car.
 - 4 To notify her about additional charges related to repairing her car.

大問3B 長文

本文を読み、次ページのQ27-Q31に答えなさい。

Helping Whales

The number of humpback whales had declined dramatically because of whale hunting. However, their population has shown some recovery in recent years. Yet, they are now facing new challenges. One of these dangers comes from a marine heat wave that raised the water temperature of the Pacific Ocean. As a result, krill, a vital food source for these whales, has decreased. Scientists point out that such rapid changes are especially dangerous for long-lived, slow-breeding animals like whales. They report that the North Pacific population of humpback whales dropped by about one-fifth in the last decade.

Scientists are closely observing whales using artificial intelligence and sound technology. With AI photo recognition, they can identify individual whales by analyzing patterns on the whales' tails. This allows them to track whale movements over long periods. They also use underwater microphones to record whale sounds and compare them with a sound library to determine species and activities. In this way, scientists can better understand whale behaviors and life by combining data from photos, sounds, and the ocean environment.

These technologies have already produced clear effects in some coastal areas. In the Santa Barbara Channel and San Francisco Bay, for example, a system called Whale Safe encouraged ships to reduce speed. It also helped them avoid collisions with whales. However, the overall problem remains serious. Along the West Coast, dozens of endangered whales die each year due to collisions, and experts believe the actual number is much higher because many deaths are never observed. This indicates that, despite progress, whales continue to face serious threats.

Experts still hope these technologies will expand to larger areas beyond North America. Such methods will likely help protect whales in busy shipping lanes with a high risk of ship strikes worldwide. Scientists also hope these technologies can be adapted for other species in danger. These cases show that cooperation among scientists, local communities, and government officials can make the oceans safer. If these groups continue to work together, people and whales may share the oceans more safely in the future.

大問3B 長文設問 Q27-Q31

前ページの本文を読み、最も適切なものを1つ選びなさい。

(27) How did high ocean temperatures affect humpback whales?

- 1 It forced them to swim into the deeper ocean.
- 2 It created a rapid change in the ocean currents.
- 3 It led to a reduction in their habitats to one-fifth.
- 4 It caused a decline in their main food supply.

(28) Scientists use artificial intelligence to

- 1 record whale movements under the sea for sound libraries.
- 2 observe whale swimming speed to understand their habits.
- 3 follow each whale by recognizing the patterns on its tail.
- 4 study their behavioral patterns to locate whale habitats.

(29) Why do experts believe they cannot know the actual number of West Coast whale deaths?

- 1 Some whales die in accidents that people never notice.
- 2 Whales often move away from the coast to safer waters.
- 3 The swimming speed of whales is too fast for ships to follow.
- 4 Several ships come to the area secretly to hunt whales.

(30) Technologies to help whales are expected to

- 1 be tested first in busy sea lanes near Asian and African ports.
- 2 be applied to protecting other animals that are also under threat.
- 3 cause opposition from local governments regarding their introduction.
- 4 bring about further destruction if they are not used carefully.

(31) Which of the following statements is true?

- 1 AI studies show whales become louder when ocean noise grows near ports.
- 2 Whale collisions on the West Coast have ended completely in recent years.
- 3 Coastal governments now observe other species at risk throughout the year.
- 4 Scientists research whales by using a variety of different methods.
