大問2A 長文の語句空所補充 Q18-Q20

次の英文A, Bを読み, その文意にそって(18)から(23)までの()に入れるのに最も適切なものを1, 2, 3, 4の中から一つ選び, その番号を解答用紙の所定欄にマークしなさい。

The Dying City

In Italy, there is a small city called Civita di Bagnoregio, sometimes known as "the dying city." It stands on a hill about 120 kilometers north of Rome. Hundreds of years ago, the village was much larger and home to thousands of people. Over time, natural disasters slowly reduced the village's size and population. Today, only a few people live there. (18), as people heard that the village might disappear very soon, visitors started coming. Now, the village has become a popular tourist destination.

To benefit from these tourists, the village introduced a new plan to help itself survive. In 2013, they started charging visitors a small entrance fee. After a few increases, tourists now pay three or five euros to enter, depending on the day. This fee (19). A manager of the village said it continued to attract large crowds and that the charging system encouraged tourists to behave more carefully in the area. In fact, the quality of tourism has improved as a whole.

Tourism has brought (20). First, the entrance fees collected have been used to protect the land and deal with natural disasters in the area. In addition, new businesses, including hotels, restaurants, and shops, have created many jobs, lowering the village's unemployment rate. Tourism has also helped improve local services, such as better medical care and easier transportation for people with disabilities. In this way, tourism has helped the village and its people, giving new life to the city once called "the dying city."

(18)

- 1 In the same way
- 2 At least
- 3 Especially
- 4 However

(19)

- 1 did not stop tourists from coming
- 2 did not bring the village good reviews
- 3 created frustration among tourists
- 4 encouraged tourists to choose other destinations

(20)

- 1 issues for the businesses in the area
- 2 positive results for tourists over locals
- 3 hard times for people with little money
- 4 several advantages to the village

大問2B 長文の語句空所補充 Q21-Q23

次の英文A, Bを読み, その文意にそって(18)から(23)までの()に入れるのに最も適切なものを1, 2, 3, 4の中から一つ選び, その番号を解答用紙の所定欄にマークしなさい。

Honey

Honey is a popular food enjoyed in many ways, from adding flavor to tea to using it in cooking. It is often believed to be a food that (21). In fact, the US government suggests that honey can be stored for about two years, mainly as a guide to quality. Even when it becomes thick or solid, it is still safe to eat. For this reason, honey is known for its special ability to last a very long time.

The reason honey stays fresh for so long lies in its unique nature. When food spoils, it usually means that small living things, such as bacteria, have grown on it. Bacteria prefer warm and wet environments. Yet, honey does not provide such conditions. Several factors in honey (22). For example, honey contains very little water and also has high levels of sugar. In addition, honey has a small amount of acid, which also makes it hard for bacteria to grow.

Still, honey is not completely safe from all changes. If a bottle of honey is left open or a used spoon is dipped into it, air, water, or bacteria can get inside and lower its quality. According to some research, storing honey in the wrong way or heating it too much may also cause changes that reduce its quality or health benefits. (23), even though honey can last for years, it is best to handle it with care.

(21)

- 1 does not go bad easily
- 2 hardly needs care before eating it
- 3 rarely needs to be replaced
- 4 does not keep its original form

(22)

- 1 help increase its temperature
- 2 help stop bacteria from surviving
- 3 allow more bacteria to grow
- 4 allow it to get even sweeter

(23)

- 1 For example
- 2 Instead
- 3 However
- 4 Therefore

大問3A About your appointment at our clinic

メールを読み、次ページのQ24-Q26に答えなさい。

From: Olivia King <contact@drking-clinic.com>
To: Roy Turner <roy.turner.0327@e.letters-world.com>
Date: August 12
Subject: About your appointment at our clinic

Dear Roy,

This is Olivia King from Dr. King Clinic. Thank you for your message regarding the change to your appointment. I understand that you would like to move it to August 25. I have checked my schedule, but I am afraid that date is not available. I will be away for a summer conference from August 23 to 27, so the clinic will be closed during that period.

Instead, I would like to suggest August 18 at 2 p.m. If this time is not convenient for you, I can offer another appointment soon after my return. The earliest available date is September 1 at 1:30 p.m. At this visit, we will proceed with your regular checkup. The checkup is expected to take no more than thirty minutes.

I will hold both appointment times for you until August 14. If I do not hear back from you by then, those times will be offered to other patients. As your appointment date is approaching, we recommend contacting us by phone to confirm your preferred time. Because we may not be able to process appointment changes by email quickly enough, you can change your appointment by giving us a call.

Thank you,
Olivia King

大問3A About your appointment at our clinic

前ページのメールを読み、Q24-Q26に答えなさい。

- (24) Olivia King told Roy Turner that
- 1 he could move his appointment to the date he had requested.
 - 2 no appointments could be made from August 23 to 27.
 - 3 she would not be available on his original appointment date.
 - 4 she would be attending a conference starting on August 25.

- (25) What is true about Roy's appointment?
- 1 August 18 is one of the dates offered for an appointment.
 - 2 September 1 is the earliest possible date suggested.
 - 3 The appointment will probably take over half an hour.
 - 4 The regular checkup will be skipped this time.

- (26) What does Olivia suggest to Roy?
- 1 Visit the clinic on August 14 for his new appointment.
 - 2 Contact her after August 14 to tell her the date he prefers.
 - 3 Send back an email before August 14 with his choice of visit.
 - 4 Call the clinic by August 14 to arrange his appointment.

大問3B 長文

本文を読み、次ページのQ27-Q31に答えなさい。

Dogs and Heat

Humans control their body temperature by sweating. Tiny parts of the skin called sweat glands produce sweat, which helps cool the body. Dogs also have sweat glands. However, they do not work as well as human sweat glands. This means dogs cannot depend on sweating to stay cool. Even on days that feel comfortable to humans, dogs may suffer from heat. Therefore, experts warn that leaving dogs outside in hot weather is very dangerous and requires careful attention.

While dogs do have sweat glands on their skin, not all types of sweat glands help lower body temperature. A particular kind, called eccrine glands, is responsible for the role, but they can only be found on the bottoms of dogs' feet and on their noses. Because there are so few eccrine glands in such small areas, they are not very effective in cooling the body. This is why sweating is not the main way that dogs keep their body temperature under control.

Instead, dogs mainly cool themselves by panting. This behavior of breathing quickly with short breaths allows dogs to release heat through the mouth and nose. However, not all dogs are good at cooling themselves in this way. The difference is related to the shape of their noses. Dogs with shorter noses have more difficulty cooling down. Studies show they are about four times more likely to get heat problems than dogs with longer noses. This is because short noses make it harder to let heat escape from the body.

Some owners walk their dogs less during the cold winter. When it warms up, they start walking dogs longer and more often. Experts believe that this sudden increase in exercise can be hard for dogs and should be avoided. To reduce the risk of heat problems, they also say that owners should give their dogs plenty of water and brush them regularly to prevent fur from trapping too much heat. Providing dogs with such an environment helps keep them safe and healthy.

大問3B 長文設問 Q27-Q31

前ページの本文を読み、最も適切なものを1つ選びなさい。

(27) What seems to be a problem for dogs?

- 1 They may have a poor system for sensing heat.
- 2 They can cool down too quickly by sweating.
- 3 They are sensitive to the heat as they are not good at sweating.
- 4 They generally feel cold whenever they go outside.

(28) What is true about the eccrine glands of dogs?

- 1 They are found throughout their lower body.
- 2 They have little effect on controlling body temperature.
- 3 They are the only type of sweat gland dogs have.
- 4 They are located in large numbers on their bodies.

(29) How can dogs' panting be described?

- 1 It refers to taking a deep breath to let the air flow through the body.
- 2 It helps all dogs equally to control their body temperature.
- 3 It describes the behavior of dogs running fast over a short distance.
- 4 It means dogs are trying to release heat quickly from their body.

(30) To keep dogs safe and healthy, experts suggest that owners should

- 1 not give their dogs too much water at any time.
- 2 not fail to brush their dogs regularly.
- 3 stop going for walks with their dogs in summer.
- 4 prepare their dogs for a sudden rise in temperature.

(31) What do we learn from the passage?

- 1 The length of a dog's nose is related to the control of body temperature.
- 2 Sweating is the most important method for dogs to control their body temperature.
- 3 It is generally believed that humans cannot handle heat as well as dogs.
- 4 Dog owners are advised to wet their dogs' noses to cool them down during summer.
