Pest Protection

Insects and other animals often make trouble for farmers. Such animals are known as pests and can be a big problem. They eat the fruits and vegetables that should be sold as food. They also carry diseases to the plants grown on farms. (28) costs farmers a lot of money. Many farmers use chemicals to keep pests away. These chemicals can be bad for the environment, though. They can kill other creatures. They can also get into the fruits and vegetables that people eat.

The owners of the Vergenoegd Low wine farm in South Africa use a different method. They want to stop pests from eating their grapes. At the same time, they do not want any chemicals to get in their wine. Their solution is to (29) to remove pests. Every day, a team of over 1,000 ducks is taken to the fields where the grapes are grown. The ducks spend all day walking around the plants and eating the pests.

Although ducks have been used to control pests in rice fields in Asia for hundreds of years, the use of ducks in other places is much less common. The ducks used on the Vergenoegd Low wine farm are a special kind. They have (30) than other kinds of ducks. As a result, they cannot fly away. Using ducks to control pests also has another advantage. Their waste helps the grape plants to grow.

大問4A Ontario Trip

メールを読み、次ページのQ31-Q33に答えなさい。

From: Joe Hess <joe-hess@kmail.com>
To: Pete Hess <p-hess22@yeehaw.com>
Date: January 23
Subject: Ontario trip

Hi Pete,

Are you excited about our trip to Ontario next month? I bought my ticket to Ontario and my return ticket yesterday. My plane leaves Chicago at 11 a.m. on February 8. The flight takes only one and a half hours. Have you bought your tickets yet? What time will you leave New York City?

Anyway, do you remember what we talked about on the phone last week? You said that you want to go fishing during our trip. My neighbor goes on fishing trips in Ontario every fall. She told me about a company that offers one-day fishing tours of Lake Huron. The company's name is Great Fish, and it costs \$300 for two people. The tour will start at 8 a.m. and finish at 4 p.m., and the price includes lunch.

I'll call the company tonight and make a reservation for February 10. My neighbor also said that we need special licenses to fish in Ontario. We can get them online, or we can buy them at a sports shop in Ontario. I think we should buy them on the Internet before we go. A one-day license costs about \$20. I can't wait to go!

Your brother,
Joe

The Mystery of the Crannogs

In some lakes in Scotland and Ireland, there are small man-made islands. These are called crannogs, and they were built long ago with large rocks that were carried into the lakes. Building the crannogs was probably a lot of hard work because some of the rocks weigh 250 kilograms. What is more, the crannogs are between 10 and 30 meters wide and connected to the land by a bridge made of rocks. Although there are over a thousand of them, no one knows the reason why they were made.

Experts used to think that the crannogs were built about 3,000 years ago. However, a recent discovery shows that some of the crannogs are much older. A diver found some broken pots in the water around the crannogs in a lake on the island of Lewis. Scientists discovered that the pots were over 5,000 years old. This led to further research and the discovery of similar items in other lakes with crannogs.

The pots were in good condition, and it was clear to researchers that they had not been used much before they were dropped in the lakes. The researchers believe that the pots were probably used for special ceremonies on the crannogs. It is not clear what the purpose of the ceremonies was, though, because there are no written records from the time when they were held.

Two thousand years after the oldest crannogs were built, people began living on them. This is shown by old pieces of wood from their houses that have been found on the crannogs. When these people built their houses, they probably damaged the crannogs. This made it difficult to find out why the crannogs were built. Researchers are continuing to look for things to solve the mystery of the crannogs, but it may take many years for them to do so.
