大問2A 長文の語句空所補充 Q18-Q20

次の英文A，Bを読み，その文意にそって(18)から(23)までの( )に入れるのに最も適切なものを1，2，3，4の中から一つ選び，その番号を解答用紙の所定欄にマークしなさい。

Child-Friendly City

In Bratislava, a central city in Slovakia, efforts have been made to create a child-friendly city through the “City for Children” program. Many schools were surrounded by dangers, and safety measures were taken as a trial. One successful example is Nevädzová Street, which used to be crowded with dozens of cars driven by parents trying to drop off children at school. Now, cars are banned from this street when children go to school. (18), during the school arrival time from 7:30 to 8:00 a.m., children can walk to school on their own.

In Bratislava, any idea is tested on a trial basis before being introduced permanently. Residents, parents, and school officials can have the opportunity to (19). City officials use colorful paint and plastic poles to show new walking areas and indicate changed traffic patterns. Based on all the opinions and observations, designers can develop more permanent solutions using better materials. This careful approach leads to a final design that meets the needs of the community and helps avoid expensive mistakes.

These urban improvements not only make the streets safe for children but also (20). Art on the streets makes the space beautiful and clearly shows where people can and should not walk. In some schools, professional artists produced artwork that reflected children's ideas about the community. Some works are playful in that they use flower art to guide children toward places around the neighborhood. These art elements are changing spaces that used to be mainly for cars into community areas where children can actively play together.

(18)

1 Similarly　**2** Otherwise　**3** For instance　**4** Instead

(19)

1 get paid for using new walking paths　**2** experience the changes and give feedback　**3** walk through the areas without noticing changes　**4** talk about the changes before the trials

(20)

1 result in educational problems　**2** change the city to be eco-friendly　**3** create a fun place for them　**4** work for the drivers from other cities

大問2B 長文の語句空所補充 Q21-Q23

次の英文A，Bを読み，その文意にそって(18)から(23)までの( )に入れるのに最も適切なものを1，2，3，4の中から一つ選び，その番号を解答用紙の所定欄にマークしなさい。

Dead Trees

Dead trees are often full of life. In the woods, for example, they support many different animals and insects in various ways. When a tree is no longer alive or standing, it becomes a habitat, or a place to live, for many living things. First, mushrooms help break down the tree. This allows insects to (21). In turn, new insects and other creatures begin to grow. Some small animals hide under bark that has fallen off the tree. Some birds build their houses in holes in the wood.

Dead trees not only provide homes for animals but also help keep forests healthy. While still alive, trees absorb carbon and help lower the amount of CO_2 in the air. (22), they serve as natural carbon storage after they die. When the wood breaks down, carbon and other elements eventually return to the ground, helping young plants grow. These substances are important for maintaining rich forest soil. In this way, dead trees are an important part of the natural forest cycle.

While it is true that dead trees are helpful to the environment, they can also create problems in some situations. For instance, it might be necessary to remove them from places such as parks, campgrounds, and roadsides for safety reasons. This is especially important (23). In these conditions, dead trees lack moisture and can catch fire easily, causing serious damage. Removing dead trees where necessary can help prevent more serious issues in the future.

(21)

1 go inside the tree and lay eggs　**2** stay away from dead trees　**3** eat mushrooms and fly far away　**4** help the tree begin to grow again

(22)

1 Despite this　**2** In contrast　**3** On average　**4** Additionally

(23)

1 in large open spaces with soft ground　**2** in the thin air near tall mountains　**3** in dry climates or during dry seasons　**4** in the cool mornings in forest areas

大問3A Inquiry about the factory

メールを読み、次ページのQ24-Q26に答えなさい。

From: Jessica Jenkins <jjenkins@riverstonehigh.edu>
To: James White <jwhite@clearplastindustries.com>
Date: April 10
Subject: Inquiry about the factory

Dear James White,
My name is Jessica Jenkins, and I teach at Riverstone High School. Our students have been learning about manufacturing in social studies class, and one of my students has shown a strong interest in how everyday products, such as plastic bottles, are made. He found your factory's information online and was impressed by the work you did. After doing some research on his own, he would like to visit your factory to learn more.

I am writing to ask whether it would be possible for the student to join one of the factory tours held on Fridays by himself. His last class of the day ends at 2:00 p.m. on Fridays, which is earlier than on other days. As the school is within walking distance of your factory, if he leaves right after the class, he should be able to arrive by 2:30 p.m.

Please let me know if there is an available date and time for a tour on a Friday in the next two months. Could you also tell us what he should bring or prepare in advance? He would like to take a few photos for his class report, so please let us know whether photography is permitted during the tour. Thank you very much for your time and consideration. I look forward to hearing from you.

Sincerely,
Jessica Jenkins
Riverstone High School

大問3A Inquiry about the factory

前ページのメールを読み、Q24-Q26に答えなさい。

(24) Why is Jessica Jenkins contacting James White?

1 To learn more about the history of the factory.
2 To request free plastic bottles for a school project.
3 To ask about the work experience for students at his factory.
4 To explain why her student hopes to go to his factory.

(25) Jessica asks whether her student can take a factory tour on Friday because

1 classes finish later on other days of the week.
2 she can take him to the factory after her class.
3 his transportation options are better on that day.
4 the factory runs exclusive tours every Friday.

(26) What does Jessica want James to do?

1 Provide details on special clothing needed for the visit in advance.
2 Inform her if the student should submit a written form before visiting.
3 Let her know when a Friday tour is possible and what to bring.
4 Suggest bringing a school camera for the student on the tour.

大問3B 長文

本文を読み、次ページのQ27-Q31に答えなさい。

The Lost City

About two thousand years ago, the city of Baia was like the Las Vegas of the Roman Empire. As it was conveniently located just about thirty kilometers from Naples on the west coast of Italy, wealthy people in Rome visited the city and enjoyed parties, hot springs, and the warm climate. Famous poets, speakers, and experts on nature also had their houses near the bay or public baths to restore their energy. Baia has been known as a hot spring resort since ancient times, and its name remains in history. Even Emperor Hadrian spent his last years in Baia.

Baia had a volcano and hot springs, which attracted visitors and made the city popular and successful. However, this volcano caused the city's collapse eventually. As is common in areas with volcanoes, the surface of the land rose and sank over many centuries. This caused more and more parts of the land to sink underground gradually. Over the past two thousand years, many parts of Baia have sunk, and about half of the city's structures are now underwater.

It was not until the 1940s that this underwater part of the city began attracting attention. An Italian military pilot discovered mysterious structures under the water in the bay while flying low. Walls and roads in the water were seen clearly in the picture he took. However, investigation in the water only began after scuba devices were advanced enough. Later investigations revealed a room filled with large sculptures, and since the early 2000s, the part of the city that sank into the sea has been managed as a protected marine area.

Currently, tourists can experience this underwater part of the city in various ways. Divers can explore the ancient Roman city in the water with guides. When the ocean is calm, visitors can see the structures in the water through the glass bottom of boats. In addition to the underwater sites, some ruins on land, such as dome-shaped public baths, can be visited on foot. Visiting Baia offers a rare chance to experience both ancient Roman history and the beauty of the sea in one place.

大問3B 長文設問 Q27-Q31

前ページの本文を読み、最も適切なものを1つ選びなさい。

(27) Why did many wealthy Romans visit Baia?

1 To relax in the warm climate, take part in parties, and recharge their energy.
2 To attend the meetings on nature that were held regularly near the bay.
3 To talk with experts and scholars who visited Baia to share ideas.
4 To study poetry from world-famous poets and join poetry contests.

(28) The gradual movement of the ground in Baia

1 allowed new volcanoes to form in the surrounding area.
2 made it impossible to successfully farm in the area.
3 led parts of the city to slowly sink beneath the water.
4 created more hot springs that attracted new tourists.

(29) A part of the city of Baia, which had disappeared underwater, was discovered

1 by a group of history experts who noticed large sculptures near the bay.
2 by some children who were painting pictures of the protected marine area.
3 through exploration by scuba divers who were searching for ancient ships.
4 through a photo taken by a pilot who was flying over the bay.

(30) One way tourists can see the ancient city of Baia is by

1 diving freely in the area without a guide to search for the ruins.
2 looking at it from the sea through special glass on a tour boat.
3 visiting the newly built history museum in Rome on a guided tour.
4 joining a tour that shows both the city ruins and the structure museum.

(31) Which of the following statements is true?

1 The area where Baia sank gained protection after it was discovered.
2 Baia was so crowded that Emperor Hadrian was unable to stay there.
3 The cool waters of lakes and rivers attracted Romans to Baia in summer.
4 Many parts of Baia have been slowly sinking since the 1940s.
