大問2A 長文の語句空所補充 Q18-Q20

次の英文A, Bを読み, その文意にそって(18)から(23)までの()に入れるのに最も適切なものを選びなさい。

Muscle Cars

Cars are not just for driving. Some people like to collect cars, too. One type of car that people in the United States like to collect is called a muscle car. Muscle cars have large, powerful engines so that they can travel very fast, and many muscle cars are rare and very valuable. Because of this, collecting muscle cars (18).

Many muscle cars were built during the 1960s and the early 1970s, and a lot of collectors regard this period as the golden age of muscle cars. Although muscle cars are still being made today, the most popular ones were made over fifty years ago. People who collect such cars feel that they are (19) by owning them. When older people see such cars, they remember the fashions, the movies, the music, and the mood of the period in which these cars were made. Moreover, younger people can get a taste of it.

Another reason that people like owning muscle cars is that they like to play with the cars' engines. Unlike many modern cars, muscle cars have simple engine designs. Their owners can take apart the engines, repair and clean them, and then put them back together so that they will be even more powerful. Many collectors buy old, damaged muscle cars and spend their free time fixing them. Often, they must travel long distances to visit special shops to get the parts that they need. However, (20), they meet new people with similar interests in different parts of the country and learn more about their favorite kinds of cars.

(18)

- 1 was banned in some places
- 2 is much easier for children
- 3 used to be more popular
- 4 can be an expensive hobby

(19)

- 1 breaking the law
- 2 helping the environment
- 3 keeping the past alive
- 4 making the problem worse

(20)

- 1 in contrast
- 2 to begin with
- 3 by doing so
- 4 for once

大問2B 長文の語句空所補充 Q21-Q23

次の英文A, Bを読み, その文意にそって(18)から(23)までの()に入れるのに最も適切なものを選びなさい。

Growing Corn

The United States is one of the world's largest producers of corn each year, with the majority grown in the nation's Midwest region. While the corn industry is an important part of the country's economy, it is also (21). The large number of corn plants make the region hotter. In an area that already has very high summer temperatures, climate change is making this a growing concern.

Interestingly, the crops do not actually change the temperature. When corn plants release water into the air - a process called corn sweat - the air becomes wetter. This added moisture makes the air more humid, which makes the temperature feel warmer. With so many corn crops in one area, thousands of liters of water are released from the plants every day. (22), local residents are feeling increasingly uncomfortable due to the higher humidity levels. In some cases, corn sweat can even make it dangerous for farmers to work outside for too long.

The situation seems to be getting worse because higher humidity is moving from rural to urban areas as the wind pushes the moist air into cities. In addition, corn crops (23). Corn releases more moisture than other plants, but most plants sweat to some degree. Soybeans also release a lot of moisture. Since corn and soybeans make up about 75 percent of the crops grown in the Midwest, any plans to increase production will only make uncomfortable weather conditions even worse.

(21)

- 1 affecting local weather
- 2 feeding wild animals
- 3 improving soil conditions
- 4 changing population trends

(22)

- 1 Even so
- 2 For this reason
- 3 In exchange
- 4 For instance

(23)

- 1 grow longer leaves and roots
- 2 can live in dry conditions
- 3 have a long growing season
- 4 are not the only cause

大問3A Your restaurant

メールを読み、次ページのQ24-Q26に答えなさい。

From: Derek Lyle <d_lyle01@ugotmail.com>
To: Anna Clemens <anna_clemens@ugotmail.com>
Date: June 2
Subject: Your restaurant

Dear Ms. Clemens,

Yesterday evening, I visited your restaurant with a friend, and I wanted to let you know how impressed we both were with the quality of the service and the food. The server, Beth, was excellent. She was polite, and she was able to answer all our questions about items on the menu. She also gave us some suggestions about what to order and made sure that we had everything we needed during our meal.

We did not have to wait long for our food to be served. It was not only delicious but also beautifully presented. I ordered a steak, and it was cooked exactly as I had asked. My friend enjoyed his main course, too. He chose one of your mushroom burgers. Afterward, he said it was probably the best burger he had ever tasted.

While we were there, I noticed a sign that said you were looking for staff. I am currently studying at college, but I would like to find part-time work in the evenings and on weekends. Although I have no experience of working in restaurants, I believe that I would be a good choice as a server or a worker in the kitchen. I am a hard worker who finds it easy to get along well with others. Please reply to this e-mail if you would like me to come for an interview.

Sincerely,
Derek Lyle

大問3A Your restaurant

前ページのメールを読み、Q24-Q26に答えなさい。

(24)

Derek Lyle mentions that the server

- 1 kept bothering him and his friend during their meal.
- 2 seemed to know very little about the items on the menu.
- 3 let him and his friend choose which table to sit at.
- 4 made some recommendations to him and his friend.

(25)

What is one thing Derek Lyle says about his food?

- 1 It took longer than he expected for it to be served.
- 2 The way that it looked was very appealing.
- 3 His steak was not cooked as he had asked.
- 4 He had never tried a mushroom burger before.

(26)

Derek Lyle asks Ms. Clemens to contact him because he wants

- 1 her to provide food for a party at his college.
- 2 to get advice about opening his own restaurant.
- 3 her to apologize and offer him a refund.
- 4 to talk with her about working at her restaurant.

大問3B 長文

本文を読み、次ページのQ27-Q31に答えなさい。

The Arts and Crafts Movement

In the United Kingdom during the nineteenth century, new technology greatly changed how people lived. Until this time, many people lived on small farms. They worked with their family members and neighbors to make by hand what they needed to live. When new machines were invented and factories were built so that items could be produced more quickly and easily, people moved into cities to take jobs in the factories. They used the money they earned to buy the things they needed, many of which were made by machines instead of by hand.

Some people disliked these changes. In particular, one group of artists and designers believed that society would be better if people went back to the old ways of making things. They formed a group that became known as the Arts and Crafts movement to share their ideas and sell their products. Although some members produced paintings and sculptures, most made objects that could be used, such as books and fabrics that had been printed by hand, furniture, and dishes. They wanted to design beautiful, high-quality items that were useful in everyday life.

William Morris, a famous designer, was one of the most important members of the Arts and Crafts movement. He was not against the use of machines. However, he disagreed with the way that the managers of large factories produced items. These managers divided the process into small stages, with each worker only working on one stage. Morris thought workers would be happier and healthier if they were involved in the whole production process, worked in small shops, and met the people who bought and used their products.

For a while, the Arts and Crafts movement was a success. Public exhibitions were held to display and sell the products made by the members of the movement, and people in the United Kingdom and abroad were inspired to form similar organizations. During the twentieth century, however, the popularity of such products declined because they took too long to make and cost too much to buy. However, the ideas of the Arts and Crafts movement continue to influence the way that artists and designers think about their work.

大問3B 長文設問 Q27-Q31

前ページの本文を読み、最も適切なものを1つ選びなさい。

(27) How did life change for people in the United Kingdom in the nineteenth century?

- 1 They left their farms and started buying things that were made in factories.
- 2 They began working with family members and neighbors to make things.
- 3 They had larger families because they were earning more money than before.
- 4 They began taking vacations in the countryside and by the sea for their health.

(28) What is one thing the members of the Arts and Crafts movement believed?

- 1 Machines would never be able to make objects as quickly as artists could.
- 2 Paintings and sculptures were not worth making because they were not useful.
- 3 The lives of people would improve if they returned to making things by hand.
- 4 Designers should specialize in producing just one or two types of items.

(29) William Morris believed that workers in factories

- 1 were not able to understand each small stage of their work.
- 2 did not have enough involvement in the production process.
- 3 had to spend too much time dealing with their customers.
- 4 could make more money if they worked in small shops.

(30) People started buying fewer products made by the Arts and Crafts movement because

- 1 they realized that it would be simpler to make the items themselves.
- 2 better-quality products were being made abroad.
- 3 the products were expensive and not easily available.
- 4 other artists and designers began to have a greater influence.

(31) Which of the following statements is true?

- 1 Technology developed in the nineteenth century had a significant effect on UK society.
- 2 Many artists and designers were not allowed to join the Arts and Crafts movement.
- 3 William Morris thought that it was wrong to use machines to produce items.
- 4 Items made by the Arts and Crafts movement have never been exhibited in public.
